I am a Software Developer with almost two years of experience working with JavaScript frameworks and Laravel. I am passionate about building web applications and continuously expanding my knowledge in software development. I am always eager to learn new technologies, explore new ideas, and apply them to real-world projects.

EDUCATION

Bachelor of Engineering	Muhammadiyah University of Riau	Sep 2024- Present
○ Current cumulative GPA: 3.86 / 4.00		

PROJECT

Web Developer	Dungeon & Dragons	Sep 2025 - Present
○ Developed the frontend for the DND website landing page.		
○ Built and implemented the website dashboard based on the provided Figma design.		
○ Translated UI/UX designs from Figma into responsive and user-friendly web interfaces.		
○ Tech Stack: Next.js, React.js, Tailwind CSS		

Web Developer	RecipeSphere	Sep 2025 - Present
○ Designed and developed the RecipeSphere website landing page based on the provided Figma design.		
○ Translated UI/UX designs from Figma into a responsive and user-friendly web interface.		
○ Implemented reusable and structured frontend components to maintain consistency across the website.		
○ Optimized the layout and user interface for a smooth browsing experience across different screen sizes.		
○ Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, Figma		

Web Developer	Digital Platform (SobatSiko)	Mar 2026 – Mar 2026
○ Developed the frontend for a psychology-focused company profile website as part of a web design competition using Vue.js.		
○ Collaborated with two team members to design and implement an engaging and user-friendly website interface.		
○ Translated the proposed UI/UX concepts into responsive and interactive web pages using Vue.js.		
○ Implemented reusable components and maintained a consistent visual design throughout the website.		
○ Worked closely with the team to ensure the website met the competition requirements and delivered a cohesive user experience.		
○ Tech Stack: Vue.js, Javascript, HTML		

Web Developer	Zie Chocolate (UMKM)	june 2026 – july 2026
○ Developed a full-stack website for Zie Chocolate, an MSME (UMKM) business, using Laravel, Vite, and MySQL.		
○ Designed and implemented the website interface based on UI/UX designs created in Figma.		
○ Developed frontend and backend functionality to present products and business information in a structured and accessible manner.		
○ Designed and integrated the MySQL database to manage product and website-related data.		
○ Collaborated with the business partner to identify their needs and develop a website that improves their online presence and makes their products more accessible to customers.		
○ Applied Laravel's MVC architecture to build a structured and maintainable web application.		
○ Tech Stack: Laravel, MySQL, Tailwind CSS
